

App·Control™

Vision Plug-In®

- Keep the whole class learning together
- Remotely launch applications on student computers
- Open and share documents with the entire class at once
- Focus student computer activity with kiosk mode
- Lock students into applications for assignments or tests
- Remove distractions - no unwanted games or chat
- Close all applications on student computers remotely
- Easy to use plug-in to Vision Classroom Management™ Software

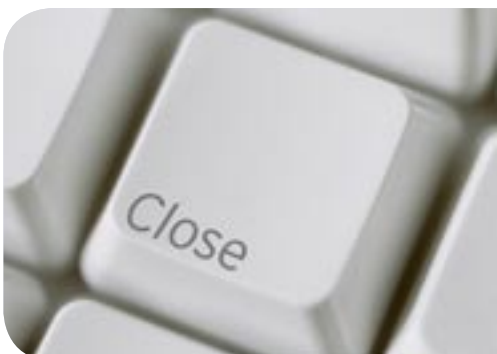

Launch

Open files and start applications on every student computer at once, or assist individual students by launching applications for them remotely. Add new applications to the launch list with ease.

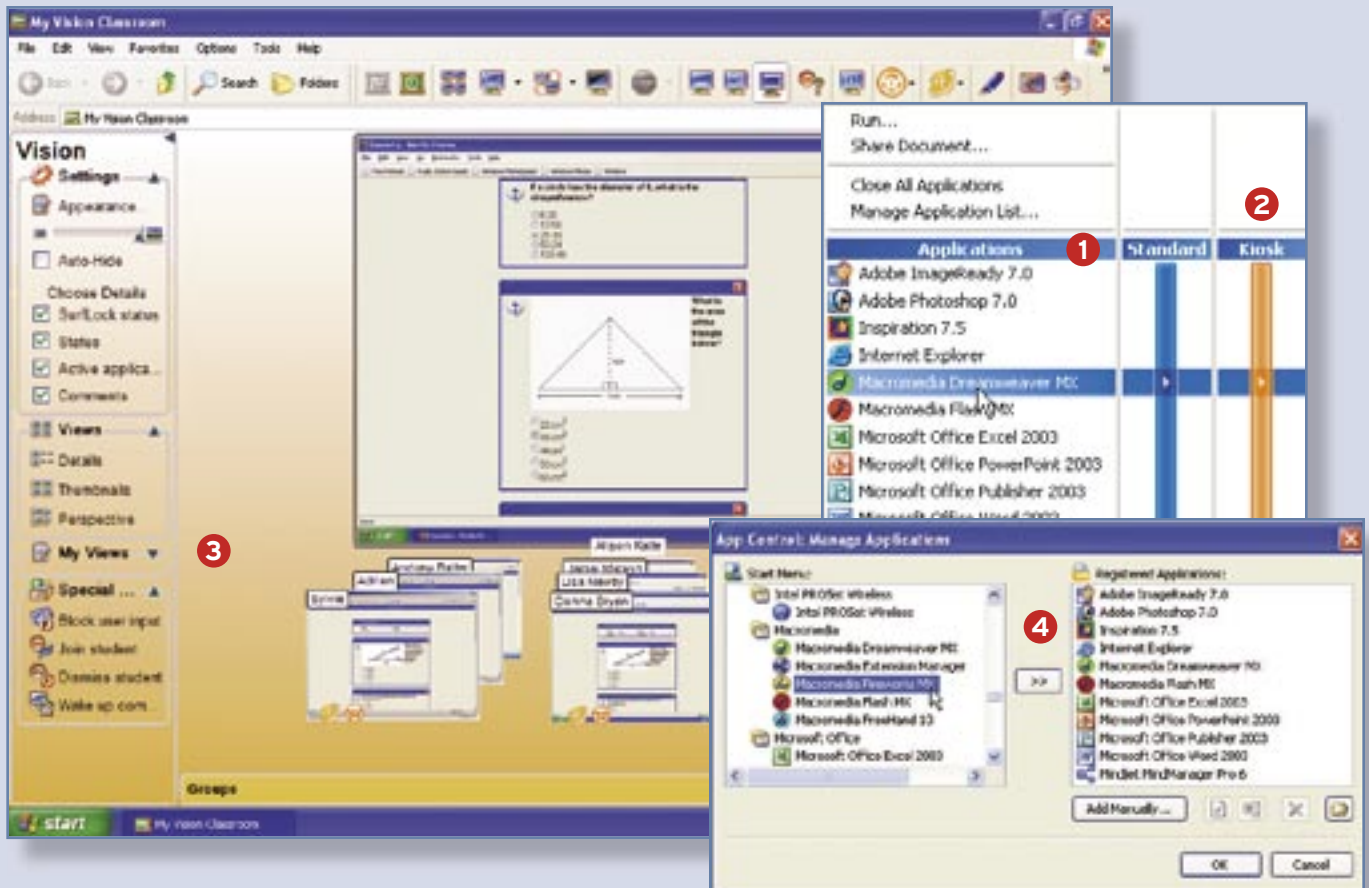

Kiosk

Focus student computer activity on teacher-selected applications with kiosk mode. No distractions - no games or chat - students can only work in the application chosen by the teacher. Great for tests.

Close

Remotely shut down all applications running on student computers with one click. End unwanted computer activity instantly. Clear all student computers at once in preparation for the next part of the lesson or the next class period.

- 1 **Control Applications** Start applications running on student computers with the click of a button. Choose standard mode or enhance your control with kiosk mode. Close all applications just as easily. All App-Control functions are simple to operate from a drop-down menu integrated into the Vision6 toolbars.
- 2 **Kiosk Mode** Launching applications in kiosk mode allows students to use all the functions of the selected application while preventing them from accessing other areas of their computer. Kiosk mode helps to focus students on the current assignment by locking out access to games, chat and other applications and enhances security during computerized testing.
- 3 **Share Documents** Start the whole class on the same assignment at once with App-Control's share document feature. Select the document you want to share from anywhere on your computer network and open it simultaneously on student computers in either standard or kiosk mode. You can also choose to share documents with individuals or groups of students.
- 4 **Manage Applications** There is no need to remember complex command strings to run applications using App-Control. Just select any application from the Windows Start menu and click the arrow next to it to add it to the list of applications you can launch on student computers.

System Requirements: App-Control works in any windows environment where Vision6 or higher is installed.
