## PRESS RELEASE

### **FOR IMMEDIATE RELEASE**

## **GenevaLogic Debuts Next Generation of Classroom Management Software *New Teacher Interface and Wireless Network Support Designed to Ensure Technology Supports Student Learning***

**PORTLAND, Ore. & MADISWIL, Switzerland – Feb. 7, 2006** – GenevaLogic today launched the next generation of its Vision® classroom management™ software for education. Designed to offer teachers a simple and effective way to manage, control and optimize the use of technology to support instruction, Vision6 combines a new and intuitive teacher interface with extensive support for both wireless and wired networks. Launched in 1996, Vision is currently used in more than 50,000 classrooms worldwide.

To streamline the use of Vision, the software's new dashboard offers teachers a thumbnail view of all student computers from an uncluttered window that is easy to customize. In addition, Vision6 supports communication across subnets and wide area networks. This means that teachers can work with students in a single computer lab or in multiple classrooms across the school, district or campus.

"At GenevaLogic, we are committed to developing classroom management software that meets the changing needs of today's schools," said Kirk Greiner, president, GenevaLogic. "We worked with educators around the world to develop new features for Vision6 that offer easy ways to ensure that student computer use supports instruction anytime, anywhere."

Another key feature in Vision6 is a wake-up command to turn computers on remotely. Using the Wake On LAN capability, teachers can power on any or all computers in a lab or classroom from their computer at the beginning of class. Then with the Shutdown feature in Vision, teachers can log off, reboot or shut down all student computers at the end of class.

In addition to popular features such as screen sharing, remote control, computer locking and remote file distribution, Vision6 now offers remote installation capabilities. This means information technology staff can install Vision remotely over the network throughout an entire school or district.

Vision6 is available in English, German, French and Italian. Existing Vision customers with active annual support and upgrade protection packages can download a free upgrade to Vision6. Under education pricing, Vision6 is available for \$35 per computer with a 10-computer minimum. Site, campus, district and volume discounts are available. For more information or to download a trial version of Vision6, visit [www.GenevaLogic.com](http://www.GenevaLogic.com) or call 866-725-7833.

### **About GenevaLogic**

GenevaLogic has one passion: enabling educators to manage, control and optimize the use of technology to support teaching and learning. Founded in 1996, with headquarters in Madiswil, Switzerland and Portland, Oregon, the privately-held company is an international leader in active teaching systems whose Vision classroom management™ software is used in more than 50,000 classrooms worldwide. The company's education software solutions – Vision, Surf-Lock®, Pointer®, Plan-It®, Protect-On® and Print-Limit® – allow schools, universities and training centers to get more learning value from their technology investments. For more information, visit [www.GenevaLogic.com](http://www.GenevaLogic.com).
